CLEANING SAND WITH SAND FILTER CLEANER

1. Turn pump off – Turn valve to “Backwash”. (NOTE: Filter Cleaner is an acid and will kill any plants. Be sure not to backwash filter cleaner into your flower beds!) Turn pump on.
2. Pour 8 oz. of Sand Filter Cleaner into skimmer WHILE BACKWASHING.
3. Backwash until you no longer see Filter Cleaner coming out the line (approximately 3 minutes).
4. Turn valve to “Rinse” for 20 seconds.
5. Turn valve back to “Filter” for at least 1 hour.
6. Bring in a water sample for testing and balancing.

NOTES:

- This should be done the first of July and when you close your pool.
- Your sand should be changed every 2 years.
- The directions are not for Baquacil users. Baquacil users should contact the store for specific directions.
